

## Erasmus Project – Vienna

### Thursday

On Thursday, we went to school and every group worked on their AV tasks. We started to work at 8am and some of the students worked in the library or in the computer room. After 50 minutes, we got a 10 minutes break and after that, everyone worked on their AV tasks again. After 50 minutes, we got another break. It went on like this until 11am.

We ate lunch together with everyone and with the teachers too! The lunch was ok, I guess. After 1 hour and 5 minutes, we worked again on our Audio Visual tasks, since they should be ready by 13.45am. Everyone was excited and we all wanted to see the presentations from the other students. We met in a classroom and saw the first video together. It was a very funny video about culture from Lea, Loris, Diana, Julie and Catalin. After that video there were some technical problems with another video, so we saw our screencast from me (Malte), Pernille, Horia, Anja and Lisa. It was about culture too! It wasn't as funny as the one before, but it was good I think. We didn't watch another video, because there was another technical problem and we didn't have so much time.

In the afternoon, we prepared for a big event (travel exhibition). Many people (parents, students, teachers) came to the gym and every country presented something about themselves. We had little paper ships with teabags and sugar (*Kluntje*), a leaflet about Rhauderfehn and a partition wall with lots of information. The Rumanians and the Austrians were wearing traditional clothes and there was music and dancing, too. It was fun, but it was also a very long day.
